kajolsunar1292@gmail.com

Dimapur, Nagaland

EDUCATION

B.Tech, Computer Science & Engineering

Expected 2027

SKILLS

Languages JavaScript, TypeScript, Python

Frontend React, Next.js, HTML, CSS, Tailwind CSS, UI/UX Design

Backend & Tools Node.js, Git/GitHub, REST APIs

Other Applied ML basics (scikit-learn, OpenCV), Playwright, FastAPI, Framer Motion

PROFILE

B.Tech Computer Science student with hands-on internship experience in app development and UI/UX & AI, seeking an entry-level Software Engineering role. Comfortable across the full stack — from React/Next.js interfaces to backend APIs and applied ML — with a track record of independently shipping complete, production-style projects.

INTERNSHIP EXPERIENCE

● UI/UX & AI Intern

TechSoul (techsoul.in) | 2026

- Contributed to UXVision AI, an autonomous visual-analysis platform combining a Playwright browser-exploration agent, an OpenCV/scikit-learn layout-scoring pipeline, and WCAG 2.1 accessibility checks to score and improve UI/UX quality.

<https://github.com/aj-techsoul/uxvision-ai>

● App Development Intern

TechieHelp (techiehelp.in) | 2025

- Built and delivered app development assignments as part of a structured internship program, strengthening core front-end and application development skills.

PROJECTS

● Nexora — Autonomous Robotics & Drone E-Commerce Platform

React 19, Vite, Vanilla CSS

- Built a full e-commerce web app for drone and robotics hardware, including a modular product configurator, a 4-way spec comparison matrix, and an Indian checkout flow (UPI, cards, net banking).
- Implemented an AI-powered product advisor chatbot to recommend hardware based on user requirements.

<https://github.com/Ks1540/nexora>

● Showmint (JumpPack-India) — Smart Theatre Booking System

Next.js, TypeScript, Tailwind CSS, Framer Motion

- Built the UI for a movie theatre booking platform — seat selection interface, booking flow, and ticket display — that integrates an AI-driven seat recommendation engine and cryptographically signed tickets.
- Implemented the front end in Next.js and TypeScript, following the team's Dark Luxe design system and Framer Motion animation guidelines.

<https://github.com/Ks1540/JumpPack-India>

● TRIS — Immersive Meghalaya Travel & Crafts Boutique

React 19, TypeScript, Vite, Tailwind CSS, Framer Motion, Express

- Built a travel and artisan-crafts platform with a scroll-bound parallax hero, an interactive destination explorer, and a full trip planner with vehicle rentals, activity add-ons, and live cost breakdowns.
- Developed a fair-trade boutique shop with cart, wishlist, and checkout flows for handmade local products.
